WARRANTY ADMINISTRATION

Conditions & service record

Eligibility and start date

Match the model, serial number/batch and actual configuration to the written order. Keep purchase records and the completed warranty dates. Coverage start and durations follow the order/contract.

Scope and exclusions

Material or workmanship coverage follows the written terms. Incompatible liquids, unsuitable terrain or utilities, contamination, impact, normal nozzle/contact wear and unauthorized changes.

Wear and service costs

Normal wear, ageing, cosmetic change, consumables and routine service require express written coverage. Labor and additional service costs are included only where agreed. Applicable statutory rights remain unaffected.

1 Submit the product record

Contact the designated service channel with model, serial/batch, order and purchase/warranty dates.

2 Describe the issue

Provide the affected component, symptoms, clear photographs and relevant circumstances.

3 Retain the assessment

Keep the written assessment, agreed remedy and approved costs. Obtain authorization before alterations.

4 Record the service action

Retain completion date, action and customer/service acknowledgment. Service does not restart or extend the term unless expressly agreed.

Service record
