STRUCTURE & CONFIGURATION

Configuration & Component Relationships

Rope Woven Back Shell

Woven back geometry supports the upper body and transfers reclined force into both side frames.

Seat Cushion Assembly

Removable seat cushioning spreads body weight evenly and allows practical cleaning during daily use.

Back Cushion Assembly

Contoured back padding softens lumbar contact and remains aligned with the woven structural support.

Chair Support Frame

A braced chair frame directs occupant weight from the seat and back into stable floor contacts.

Seat Support Base

Seat-base structure fixes cushion geometry and transfers occupant weight into the main chair frame.

Configuration boundary

Component names identify stated or visible product groups only. The exact installed version and inclusion of accessories are confirmed in the applicable order.

STRUCTURE

Structure Decomposition

This current-product structure view supports assembly recognition and configuration review. It is intended for product identification and option verification.

Selection significance

Confirm that the depicted assemblies and connection relationships match the exact model and ordered configuration. Do not infer hidden components or service steps from the image.
