

SOFA PRODUCT MANUAL

Multi-functional single sofa

Product Specifications, Space Planning & Selection

PRODUCT CODE

**EXC-
1787104557956040**

Product format

Single-seat upholstered sofa

Catalogue model

CY-DGNDR-S33BLACK

Upholstery

Eco-leather

Configuration focus

Manually crank

Current-model view

A concise overall view of the selected sofa model. Use the listed model, upholstery, colour and configuration fields together when reviewing the order.

Contents

DOCUMENT MAP

Manual sections

Read the technical data first, then review room fit, upholstery and the ordered configuration.

01	Technical specifications	3
02	Space planning and configuration review	4
03	Current-model views	5
04	Assembly diagram	6
05	Application fit and order confirmation	7

Selection review path

Use one continuous decision path so the model identity and configuration remain aligned.

01	Confirm exact model identity
02	Read every available technical field
03	Review room and clearance requirements
04	Confirm upholstery, colour and adjustment configuration
05	Record the final agreed configuration

Data first

Current-model data begins on page 3.

Selection scope

Recognition, room fit and configuration review.

Fact boundary

Only listed values are treated as product facts.

CURRENT-MODEL DATA

Technical Specifications

Available product fields

All available current fields are shown below; absent fields are intentionally omitted.

Catalogue model	CY-DGNDR-S33BLACK
Product family	S35
Fabric	Eco-leather
Optional colors	Red-brown, black
Feature Configuration	Manually crank
Net Weight (KG)	40.7
Lying length (cm)	170
Product Dimensions (cm)	84*102*100

Model identity

Use CY-DGNDR-S33BLACK as the exact catalogue identity throughout the selection record.

Upholstery review

Compare the listed upholstery with touch, cleaning and visual requirements for the intended indoor setting.

Colour review

Confirm the selected colour against the room palette, lighting conditions and the agreed finish schedule.

Configuration review

Where an adjustment or recline configuration is listed, confirm it together with the required use envelope.

Reading rule

Technical values apply only to the selected model and agreed configuration. General planning guidance elsewhere in this manual does not create an additional product specification.

ROOM FIT AND CONFIGURATION

Space Planning & Selection

01

Define the use setting

Identify whether the sofa will serve a living room, reading area, private suite or reception setting.

02

Set the placement envelope

Use 84*102*100 as the product envelope.

03

Review the recline envelope

If the ordered configuration reclines, reserve rear and front clearance before final placement.

04

Confirm access and turning space

Check doors, corridors, lifts and room turning points against the agreed product envelope.

05

Match upholstery and colour

Upholstery: Eco-leather; colour: Red-brown, black.

06

Freeze the ordered configuration

Listed configuration: Manually crank.

Review item	Current listed field	Selection action
Exact identity	CY-DGNDR-S33BLACK	Match the model on every selection and order document.
Product format	Multi-functional single sofa	Review the single-seat format against the intended room use.
Intended setting	Indoor relaxation, reading and viewing	Coordinate the sofa position with circulation and adjacent furniture.
Upholstery	Eco-leather	Choose against appearance, touch and cleaning needs.
Colour	Red-brown, black	Confirm under representative room lighting.
Adjustment	Manually crank	Reserve the matching use envelope only when included.
Product envelope	84*102*100	Check floor area, surrounding clearance and turning space.

IMAGE OVERVIEW

Current-Model Views

View summary

The image group provides a concise overall view of exterior form, upholstery zones and visible configuration. Numeric dimensions and ordered finishes remain governed by the technical data and confirmed configuration.

ASSEMBLY RELATIONSHIP

Assembly Diagram

Current assembly diagram. Shown proportionally and without added marks.

Structure identification

Read the separated view from the upholstered backrest and seat toward the arm supports, base structure and adjustment linkage.

Assembly relationship

Use the diagram to understand how major visible assemblies relate to one another in the current model.

Selection use

Confirm that the ordered configuration contains the expected major assemblies before finalizing the selection record.

Diagram boundary

This is an identification diagram only; workshop procedures and fastener settings are outside this page.

APPLICATION AND DECISION
RECORD

Application Fit & Order Confirmation

Living room

Individual relaxation, reading and everyday viewing in a planned seating zone.

Reading area

A single-seat position beside shelving, a side table or controlled lighting.

Private suite

A compact upholstered seat for bedroom, hotel or serviced-apartment leisure areas.

Reception setting

Individual guest seating where model, finish and room palette are coordinated.

Exact model

Record CY-DGNDR-S33BLACK without abbreviating the catalogue identity.

Upholstery and colour

Record the selected material and colour exactly as agreed.

Dimensions and clearance

Confirm the product envelope, use envelope and room clearance together.

Functional configuration

Record adjustment or recline features only when included in the agreed configuration.

Final decision

Approve the selection only when the exact model, upholstery, colour, dimensions, functional configuration and room fit have been reviewed as one coordinated record.
