STRUCTURE & CONFIGURATION

Configuration & Component Relationships

Rectangular Head Pillow

A loose padded pillow supports the upper neck area while keeping the recliner's relaxed low-seat profile visually complete.

Segmented Backrest Cushion

The wide back cushion uses horizontal padded sections and stitched piping to provide soft leaning support.

Thick Seat Cushion

The main seat cushion keeps the low lounge posture and shows the same quilted surface and rounded front edge.

Extendable Footrest Cushion

The front footrest panel extends forward for leg support while matching the red-brown leather finish.

Side And Base Shell Panels

The curved side panels wrap the lower body of the chair and connect the seat to the support base.

Configuration boundary

Component names identify stated or visible product groups only. The exact installed version and inclusion of accessories are confirmed in the applicable order.
