

Golf cart

KPL G2+2-GB

Golf Cart KPL G2 2-GB

Product Selection & Technical Specifications Manual

Product code EXC-1786095092387177

Overall dimensions

3150*1350*1980 (mm)

Maximum speed

30 Km/h

Braking distance

≤4m

Review current-model technical data first, then confirm passenger demand, vehicle systems, configuration and route fit.

01 Technical Specifications 3

02 Product Positioning & Core Value 4

06 Product Views 10

Vehicle selection path

01 Model identity

02 Passenger capacity

03 Battery and motor

04 Chassis systems

05 Vehicle envelope

06 Route-fit review

Reading scope

This manual supports vehicle recognition, technical review and model selection.

Data order

Technical data comes first, followed by passenger layout, systems, options and product views.

Configuration rule

Items not stated for the current model are not treated as standard equipment.

DATA REVIEW

Technical Specifications

Values, units and conditions are stated for the current model. Review standard equipment, options and attachments separately.

Overall dimensions	3150*1350*1980 (mm)
Maximum speed	30 Km/h
Braking distance	≤4m
Climbing angle	25
Front suspension	MacPherson independent suspension
Rear suspension	Arm suspension
Steering system	Self-adjusting gear and rack
Seat	Foamed sponge, high-resilience PU leather upholstery
Car body material	PP hard plastic front body PP hard plastic rear body
tire	12 inches
Lead-acid battery	60V100AH
Minimum ground clearance	240mm
Motor	4KW
Number of passengers	4

Specification reference view
The image supports model recognition; technical values follow the specification table.

Product Positioning & Core Value

Vehicle overview

A concise view of passenger layout, roof coverage and overall vehicle proportions.

This golf cart provides quiet, convenient short-distance passenger transport for golf courses, resorts, scenic areas, industrial parks, and other enclosed or semi-enclosed sites.

Number of passengers: 4; Lead-acid battery: 60V100AH; Motor: 4KW; Overall dimensions: 3150*1350*1980 (mm)

Passenger Layout · Electric Drive · Chassis Systems · Route Fit

Model Identity · Technical Data · Vehicle Layout · Selection Boundary

Passenger and site fit

Review Number of passengers: 4 together with site access, route width and turning space.

Power and performance

Lead-acid battery: 60V100AH; Motor: 4KW; Maximum speed: 30 Km/h; Braking distance: ≤4m; Climbing angle: 25.

Vehicle envelope

Overall dimensions: 3150*1350*1980 (mm); Minimum ground clearance: 240mm.

Selection Path & Fit Criteria

Review each item against the actual duty and current configuration. Values or capabilities not listed are not default equipment.

Current-model review fields

- Overall dimensions
- Maximum speed
- Braking distance
- Climbing angle
- Front suspension
- Rear suspension
- Steering system
- Seat
- Car body material
- tire

- 01 Application and passenger demand
- 02 Vehicle envelope and route width
- 03 Battery and motor system
- 04 Steering, suspension and braking
- 05 Seat and body configuration

Current-model anchors

Overall dimensions	3150*1350*1980 (mm)
Maximum speed	30 Km/h
Braking distance	≤4m
Climbing angle	25
Front suspension	MacPherson independent suspension
Rear suspension	Arm suspension

Vehicle selection view

Use the image with the listed passenger, dimensional and chassis data.

Before final selection

- 01 Confirm model identity
- 02 Confirm passenger capacity
- 03 Confirm electric system
- 04 Confirm route-fit boundary

COMPLETE SELECTION
INFORMATION

Vehicle Fit, Structure & Configuration

Applications & Capability

Natural Travel Along a Fairway Route

Compare route width, turning space, surface condition, passenger demand and the listed vehicle data before selection.

Structure, Systems & Configuration

Roof Assembly

Includes black sun-shade roof, support frame and connectors for sun protection and better vehicle stability.

Windshield Assembly

Consists of front windshield, frame, rear-view mirrors and brackets to block wind-dust and improve driving vision.

Seat & Driving-Control Assembly

Contains seats, backrests, armrests, steering wheel and steering parts to support drivers and passengers.

Front-Protection & Body-Shell Assembly

Made of hood, trim, bumper and front covers, protecting inner components and forming vehicle appearance.

Rear-Side Body-Cover Assembly

Includes rear wheel housings, side shells and rear covers, protecting body structure and beautifying outlook.

Main Chassis-Frame Assembly

Chassis frame, cross beams and mounting supports act as the load-bearing base for all vehicle systems.

System and configuration view

A concise visual reference for the vehicle systems and configuration discussed on this page.

COMPLETE SELECTION
INFORMATION

Vehicle Fit, Structure & Configuration

Structure, Systems & Configuration

Front-Suspension & Steering Assembly

Front axle, knuckle, shock spring and control arm realize steering and provide support for front wheels.

Standard Configuration, Options & Attachments

Sand Bottle

Current-page course-service item; confirm holder arrangement, bottle quantity and inclusion in the selected configuration.

Suspension and Steering Assembly

Configuration item shown on the current page; confirm exact specification and inclusion in the order or contract.

All-Terrain Tire and Alloy Wheel

Current-page wheel or tire option; confirm diameter, tread and vehicle compatibility in the selected configuration.

Electric Drive Motor

Current-page drive-system option; confirm rated output and system compatibility against the ordered vehicle.

Golf Bag Holder

Current-page golf-equipment carrying option; confirm mounting position, capacity and inclusion in the selected configuration.

Golf Cart Charger

Current-page charging option; confirm input supply, battery-system compatibility and connector form before selection.

System and configuration view

A concise visual reference for the vehicle systems and configuration discussed on this page.

Vehicle Fit, Structure & Configuration

Standard Configuration, Options & Attachments

Headrest Bench Seat

Current-page passenger-area option; confirm seat count, orientation and inclusion in the ordered configuration.

Lead-Acid Battery Pack

Current-page battery option; confirm voltage, capacity, chemistry and charger compatibility in the selected configuration.

Outdoor Soundbar

Current-page audio option; confirm electrical compatibility, mounting position and inclusion in the selected configuration.

Rear Storage Box

Current-page storage option; confirm usable space, mounting position and inclusion in the selected configuration.

Selection Questions

Which fields determine passenger capacity?

Number of passengers: 4.

Which fields define the electric system?

Review Lead-acid battery: 60V100AH and Motor: 4KW together with the controller and charging configuration.

Which fields govern route selection?

Overall dimensions: 3150*1350*1980 (mm); Minimum ground clearance: 240mm, together with turning space, surface condition and local site rules.

System and configuration view

A concise visual reference for the vehicle systems and configuration discussed on this page.

STRUCTURE
DIAGRAM

Vehicle Assembly and System Relationship

Assembly identification

The separated view distinguishes the body, canopy, passenger area, chassis and running-system assemblies.

System relationship

Read from the main frame toward the body, steering, suspension, drive and passenger-supporting structures.

Configuration review

Use this diagram with the technical table and current configuration records when reviewing the selected vehicle.

Reading boundary

This page identifies assemblies and relative positions; it is not a repair, disassembly or workshop instruction.

Current-model assembly relationship

The complete diagram is shown proportionally and without added marks.

Dimensions, ratings and supplied configuration remain governed by the current technical data and confirmed order.

IMAGE OVERVIEW

Vehicle Configuration and System Views

This image group provides a concise current-model overview of visible configuration and system relationships for Golf Cart KPL G2 2-GB.
