STRUCTURE & CONFIGURATION

Configuration & Component Relationships

Floral Backrest Cushion

The broad shell-shaped backrest uses the original white-and-brown floral upholstery to provide soft upper-body support while preserving the chair's distinctive rounded silhouette.

Rear Back Support Shell

This brown leather rear shell supports and visually finishes the backrest assembly, keeping the exterior neat, durable, and consistent from side and rear viewing angles.

Floral Seat-and-Wing Cushion

The integrated floral seat cushion includes the chair's curved wing-like edges, creating a comfortably enveloping seating surface with smooth transitions into the surrounding side structure.

Left Leather Side Shell

The left brown leather outer shell forms one side of the chair body, protecting the upholstered edge while contributing to the balanced rounded profile.

Right Leather Side Shell

The matching right brown leather outer shell completes the chair's symmetrical side enclosure and provides a durable, easy-care surface around the seating area.

Configuration boundary

Component names identify stated or visible product groups only. The exact installed version and inclusion of accessories are confirmed in the applicable order.
